Producer/Consumer Problem

- One or more producers are generating data and placing these in a buffer
- A single consumer is taking items out of the buffer one at time
- Only one producer or consumer may access the buffer at any one time
Producer

producer:
while (true) {
    /* produce item v */
    b[in] = v;
    in++;
Consumer

consumer:
while (true) {
    while (in <= out)
        /*do nothing*/;
    w = b[out];
    out++;
    /* consume item w */
}
Producer/Consumer Problem

![Diagram of producer/consumer buffer]

Note: shaded area indicates portion of buffer that is occupied

Figure 5.8 Infinite Buffer for the Producer/Consumer Problem
Producer with Circular Buffer

producer:
while (true) {
    /* produce item v */
    while (((in + 1) % n == out))
        /* do nothing */;
    b[in] = v;
    in = (in + 1) % n
}

Consumer with Circular Buffer

cconsumer:
while (true) {
    while (in == out) {
        /* do nothing */
    }
    w = b[out];
    out = (out + 1) % n;
    /* consume item w */
}
Figure 5.12 Finite Circular Buffer for the Producer/Consumer Problem
```c
/* program producerconsumer */
int n;
binary_semaphore s = 1;
binary_semaphore delay = 0;
void producer()
{
    while (true)
    {
        produce();
        semWaitB(s);
        append();
        n++;
        if (n==1)
            semSignalB(delay);
        semSignalB(s);
    }
}
void consumer()
{
    semWaitB(delay);
    while (true)
    {
        semWaitB(s);
        take();
        n--;
        semSignalB(s);
        consume();
        if (n==0)
            semWaitB(delay);
    }
}
void main()
{
    n = 0;
    parbegin (producer, consumer);
}
```

Figure 5.9 An Incorrect Solution to the Infinite-Buffer Producer/Consumer Problem Using Binary Semaphores
/* program producerconsumer */
int n;
binary_semaphore s = 1;
binary_semaphore delay = 0;
void producer()
{
    while (true)
    {
        produce();
        semWaitB(s);
        append();
        n++;
        if (n==1) semSignalB(delay);
        semSignalB(s);
    }
}
void consumer()
{
    int m; /* a local variable */
    semWaitB(delay);
    while (true)
    {
        semWaitB(s);
        take();
        n--;
        m = n;
        semSignalB(s);
        consume();
        if (m==0) semWaitB(delay);
    }
}
void main()
{
    n = 0;
    parbegin (producer, consumer);
}

Figure 5.10   A Correct Solution to the Infinite-Buffer Producer/Consumer Problem Using Binary Semaphores
/* program producerconsumer */
semaphore n = 0;
